ANALYTICAL BALANCES

DS R2 PLUS

Product Features

Ergonomic Mechanical Design

Spacious weighing chamber and large open-door clearance allow easy access to the weighing pan and facilitate use of laboratory glassware of various sizes and dimensions. Improved aluminum base of the balance guarantees stability of the weighing system. DUAL-CLICK system facilitates tool-free disassembly and assembly of the weighing chamber. Locating the USB interface at the balance front makes it easier to communicate with peripherals.

Levelling System

Clearly visible levelling device located at the front of the weighing chamber facilitates level control. Antistatic Weighing Chamber Weighing chamber panes feature antistatic coating compensating electrostatic charges on the sample and accessories used for mass measurement.

Antistatic coating has been applied in balances with the readability of $d=0.01\text{mg}$

Uncomplicated and Intuitive Operation

Large, easy-to-read LCD display offers not only a clear presentation of the weighing result, but also enables displaying messages related to the drying process as well as pictograms of active functions and working modes. Quick access keys located on the operation panel enable you to run a given function with just one click.

Data Management

DS R2 PLUS information system is based on operators, products, Weighing s and tares databases. All saved data can be analysed, exported, imported or exchanged between weighing instruments

ALIBI Memory

Internal ALIBI memory guarantees safety and automatic record of measurements copies, it also offers possibility to preview, copy and archive data.

Kensington Lock

DS R2 PLUS balances are equipped with Kensington Lock, which allows to secure the device against theft.
