HIGH PRESSURE CLEANER

DS –H20

Product Overview

A **High Pressure Cleaner** is a powerful cleaning system designed to remove stubborn dirt, grease, oil, dust, and contaminants using a high-pressure water jet. Its robust construction and efficient pumping system provide reliable performance for demanding cleaning applications. Suitable for industrial, commercial, laboratory, automotive, and general maintenance environments, it delivers effective cleaning while reducing manual effort and water consumption.

Product Features

1. diesel-powered drive: not restricted by power supply, meets various complex working conditions.
2. precision-machined forged copper pump body: corrosion-resistant and impact-resistant.
3. boiler control system adopts 12v low-voltage control: safe and reliable.
4. vertical stainless steel hot/cold water heat exchanger: 90% high efficiency, low fuel consumption.
5. boiler protection device (anti-dry burn control): for no water, stainless steel heater jacket.
6. split-type pressure regulating valve (outlet valve)
7. high-sensitivity thermostat (0–150°c)
8. ignition system photoelectric sensor for real-time monitoring

Specification

Product Type	DS-H20
Rated Pressure	200bar
Max. Pressure	250bar
Flow Rate	14–15 L/min
Power Unit	LTD186FA
Horsepower	10HP
Rotational Speed	3100rpm
Pump Head Model	3WZ-1510AQ
Max. Boiler Temperature	140°C
Max. Outlet Water Temperature	90°C
Weight	220kg
Carton Dimensions	1220x880x1010mm
